Experience

Senior Software Engineer II - HubSpot

2021 - Present

Accomplishments:

- Drive technical direction and cross-team execution for scalable, configurable sales outreach automation that enables customers to tailor workflows to their business needs.
- Lead collaboration across multiple product teams to design and deliver reliable, user-facing features.
- Mentor engineers and provide technical guidance to strengthen engineering practices and delivery across teams.
- Build and operate high-throughput services that process tens of millions of tasks and handle millions of requests daily.
- Establish and enforce quality controls for AI-assisted development to improve delivery speed while maintaining engineering standards.

Technologies:

Java, MySQL, HBase, AWS, Python, Claude, OpenAI

Senior Software Engineer - Retailnext

2018 - 2021

Accomplishments:

- Maintained a cloud-based microservice architecture across AWS and GCP using Terraform.
- Processed positional analytics data to support real-time reporting.
- Integrated point-of-sale data with third-party services to support in-store positional tracking.
- Maintained services that streamed data from thousands of sensors.
- Supported the transition of the platform from AWS to GCP.

Technologies:

Go, Ruby on Rails, Terraform, Puppet, Docker, Cassandra, AWS, GCP

Lead Software Engineer - Synctree

2015 - 2018

Accomplishments:

- Led a multi-organization team in launching an educational multimedia platform for desktop, mobile, and native environments. - https://www.storybots.com
- Led a small team in delivering a social media-based e-commerce platform in under six months. - https://boo.st
- Developed internationalization and CMS backend features for Disney public websites. - https://disneyinternational.com
- Mentored developers on emerging technologies, engineering best practices, and unit testing.

Technologies:

Ruby on Rails, Node.js, AWS, Docker, React, React Native, ASP.NET, Java, Python, Firebase, PostgreSQL, Redis, MongoDB

Sr. Software Engineer - Stayhealthy

2013 - 2014

Accomplishments:

- Collaborated with product, design, and QA teams to modernize a legacy internal application and build a comprehensive test suite.
- Developed integrations with an existing fleet of kiosks to collect readings from consumer devices.

Technologies:

PHP, Symfony, ASP.NET, jQuery, WebSockets, SQL Server, PostgreSQL, MongoDB

Sr. Software Engineer - Spokeo

2012 - 2013

Accomplishments:

- Developed a criminal record search product with a comprehensive test suite. - https://www.spokeo.com/court-record-search
- Implemented user search history and bookmarking features.

Technologies:

Ruby on Rails, jQuery, MySQL

Sr. Software Engineer - Chegg, Inc.

2011 - 2012

Accomplishments:

- Integrated the acquired Homework Help product into the main site with a comprehensive test suite. - https://www.chegg.com/study
- Converted 2 million legacy Flash resources into DRM-enabled HTML5 resources.

Technologies:

PHP, ASP.NET, jQuery, MySQL

Software Engineer - Civic Resource Group

2010 - 2011

Accomplishments:

- Collaborated with clients to deliver public-facing websites. - https://www.wyomingbusiness.org | https://www.travelwyoming.com
- Developed the company's public-facing website. - https://civicconnect.com

Technologies:

ASP.NET, Flash, SQL Server, jQuery

Programmer - Hydraulx

2009 - 2010

Accomplishments:

- Developed an internal render-farm status and maintenance application with live updates.
- Developed an internal seating chart application to identify users logged in at specific workstations.

Technologies:

PHP, MySQL, jQuery, ExtJS, Flash

Education

ITT Technical Institute

B.S. Digital Entertainment - 2005 - 2007

A.S. Multimedia - 2003 - 2005
